

Power Supply Measurement & Alarm with SMS facility

Scope:

The Power Supply Measurement & Alarm with SMS facility continuously measures & displays each power supply connected to the system. In case the value of the connected power supply goes above or below the set values, an Audio/Visual alarm is given. In addition to these alarms, a customisable SMS can be sent to 5 different numbers. A separate configurable SMS is also sent to the pre-fed numbers when the supply returns to the desired level

Reliance Electricals

Features:

- Can monitor & display status of 12 or 21 power supplies
- Each power supply has a separate panel meter to give an instant view of all the supplies connected
- Alarm values of each power supply can be customised separately
- Separate modules can be customized in accordance with the number of power supplies to be monitored
- Wall-mounting facility available
